Alera Group Hiring Team

Re: Head of AI

Dear Alera Group Hiring Team,

Defining an enterprise AI strategy, governance model, investment roadmap, and adoption program closely matches the work I have led across AI, cloud, data, and regulated technology.

At Intelligent DataWorks, I own strategy, architecture, delivery, governance, security, operations, and a \$900,000 budget for a production AI platform supporting 70+ automations across more than 20 workflows. Selected processes run up to 50 times faster, and the platform sustains 99.9% availability. I recruited and technically led 11 engineers while translating business workflows into governed production capabilities.

At AWS, I advised more than 200 enterprises and built global AI/ML and data communities totaling 180+ professionals. At MassMutual, I led architecture and engineering across five privacy and AI-governance initiatives spanning policy automation, metadata, transparency, bias, drift, human oversight, monitoring, and auditability.

My insurance-brokerage experience is limited, but I bring direct regulated financial-services, privacy, governance, and transformation experience. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about building an enterprise AI portfolio that produces measurable value while managing organizational and technology risk.

Sincerely,

Keith Steward, Ph.D.
