Alt-Alpha Capital Hiring Team

Re: Vice-President for Digital Transformation

Dear Alt-Alpha Capital Hiring Team,

Shaping digital strategy across a portfolio of growing companies closely matches my experience helping leaders translate business constraints and emerging technology into executable roadmaps, production systems, and measurable value.

At AWS, I advised more than 200 enterprises and C-level stakeholders on AI, data, and cloud adoption. At TriMark, I aligned Finance, Marketing, Supply Chain, and technology leaders around more than 50 use cases, delivered the company's first AWS data lake in seven months, and reduced cross-ERP reporting from approximately two months to one day.

Most recently, I built and technically led an 11-engineer organization while defining the product, architecture, and delivery model for a production GenAI platform. The first commercial release shipped within eight months and now supports more than 70 automations across 20 workflows, accelerating selected work by up to 50x. This required opportunity prioritization, vendor and model evaluation, implementation governance, risk management, and continuous stakeholder alignment.

My direct operating background is in enterprise technology and startups rather than a venture-capital fund, but the transformation capabilities are highly transferable to portfolio value creation. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about helping Alt-Alpha and its portfolio leaders turn digital priorities into scalable results.

Sincerely,

Keith Steward, Ph.D.
