Dynata Hiring Team

Re: Vice President, AI Transformation & Value Creation

Dear Dynata Hiring Team,

Dynata's mandate calls for an executive who can turn AI potential into an accountable enterprise portfolio with measurable value, responsible governance, and sustained adoption. That is the intersection of my AI-platform, transformation, and executive-advisory experience.

At Intelligent DataWorks, I recruited and technically led an 11-engineer organization while architecting a production GenAI platform built on LLMs, agents, RAG, APIs, vector search, workflow orchestration, and AWS. We shipped the first commercial release within eight months and now support 70+ automations across more than 20 workflows, accelerating selected work by up to 50x. This required prioritizing use cases, balancing investment and risk, establishing reusable controls, and connecting delivery decisions to user value.

Previously, I advised more than 200 AWS enterprises on AI, data, and cloud adoption and developed global specialist communities totaling 180+ people. At MassMutual, I led secure cloud implementation across privacy and AI-governance initiatives and delivered a platform that automated approximately 90% of a manual workflow. Across these roles, I translated technical choices into executive decisions, operating standards, adoption plans, and measurable outcomes.

Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about building Dynata's AI transformation portfolio, governance model, and value-realization discipline.

Sincerely,

Keith Steward, Ph.D.
