Enlyte Hiring Team

## **Re: Vice President, Artificial Intelligence**

Dear Enlyte Hiring Team,

Establishing an enterprise AI Center of Excellence that combines innovation, governance, and practical adoption closely matches how I have built AI organizations, platforms, and operating standards.

At Intelligent DataWorks, I defined AI strategy and architecture, recruited and technically led 11 engineers, and remained hands-on with LLMs, RAG, agents, vector search, evaluation, APIs, and AWS. We delivered a production platform within eight months that supports 70+ automations across more than 20 workflows and accelerates selected work by up to 50x.

At MassMutual, I led cloud implementation across five privacy and AI-governance initiatives, advising on transparency, bias, drift, monitoring, security, and auditability. At AWS, I created global AI/ML and analytics communities totaling 180+ specialists, trained 180+ architects, and advised 200+ enterprises on AI and data adoption.

My regulated-industry background spans insurance, pharmaceuticals, bioinformatics, HIPAA, and FDA-cleared health technology. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about building Enlyte's responsible, reusable enterprise AI capability.

Sincerely,

Keith Steward, Ph.D.
