HardLoop Hiring Team

## **Re: VP Data Analytics and AI**

Dear HardLoop Hiring Team,

Leading a data, analytics, and AI organization while remaining close to the systems and models closely matches my experience as a player-coach across enterprise platforms and production automation.

At Intelligent DataWorks, I architected and helped build a production agentic platform supporting 70+ automations across more than 20 workflows. I recruited and technically led 11 engineers while owning strategy, architecture, delivery, data quality, evaluation, governance, security, metrics, and operations. Selected workflows run up to 50 times faster, and the platform sustains 99.9% availability.

At TriMark, I aligned leaders around more than 50 use cases, built a seven-person AWS data-engineering team, and delivered the first enterprise data lake across 11 divisions in seven months. That platform reduced cross-ERP reporting from roughly two months to one day. At AWS, I advised more than 200 enterprises on AI, ML, data, analytics, and cloud modernization.

My healthcare experience includes regulated software and life sciences rather than direct revenue-cycle management or clearinghouse EDI. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about building a trusted data and AI operating capability that improves decisions and automates high-value work.

Sincerely,

Keith Steward, Ph.D.
