NAYA / Fidicix Hiring Team

Re: Chief Technology Officer

Dear NAYA / Fidicix Hiring Team,

Leading company-wide technology and AI strategy while building the engineering organization, platforms, and operating standards closely matches my founder, VP, and enterprise-leadership work.

At Intelligent DataWorks, I own strategy, product, architecture, engineering, security, delivery, operations, and a \$900,000 budget. I built the AssistX core and first 80% of its initial application, recruited and led 11 engineers, and delivered 70+ automations across more than 20 workflows with 99.9% availability.

At AWS, I advised more than 200 enterprises and built global technical communities totaling 180+ professionals. Earlier leadership roles included VP of AI/ML, manager-of-managers responsibility, regulated healthcare platforms, and enterprise data modernization across 11 divisions.

The LinkedIn header identifies NAYA while the description identifies Fidicix, so I would first confirm the employer and venture structure. The technology, AI, organization-building, architecture, governance, and CEO-partnership mandate is otherwise directly aligned. I would bring disciplined execution, transparent metrics, and practical technical judgment from day one.

Sincerely,

Keith Steward, Ph.D.
