Neuron7.ai Hiring Team

Re: Vice President of Engineering

Dear Neuron7.ai Hiring Team,

Leading and scaling an engineering organization that delivers enterprise-grade AI products matches my combination of engineering strategy, hands-on AI architecture, and distributed-team development.

At Intelligent DataWorks, I built and technically led an 11-engineer team while architecting a production platform with LLMs, RAG, agents, vector search, APIs, orchestration, and AWS. We delivered the first commercial release within eight months; it now supports 70+ automations across more than 20 workflows and accelerates selected work by up to 50x.

My earlier experience supports the scale and operating mandate. At AWS, I advised 200+ enterprises on AI, distributed data, and cloud architecture and developed global technical communities totaling 180+ specialists. At SuccessKPI, I recruited and led a distributed team that shipped an AI-powered contact-center SaaS release within six months. Across these roles I established architecture, CI/CD, quality, security, and operational practices while translating customer needs into roadmaps and reliable systems.

Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a conversation about strengthening engineering leadership and scaling enterprise AI products for service operations.

Sincerely,

Keith Steward, Ph.D.
