Neuron7.ai Hiring Team

Re: Vice President of Engineering

Dear Neuron7.ai Hiring Team,

Leading and scaling an engineering organization that delivers enterprise-grade AI products closely matches my combination of engineering strategy, hands-on AI architecture, and distributed-team development.

At Intelligent DataWorks, I personally built the core and first 80% of a platform with LLMs, RAG, agents, vector search, APIs, orchestration, and AWS, then recruited and led 11 engineers. We shipped the first commercial release within eight months; it now supports 70+ automations across more than 20 workflows and sustains 99.9% availability.

At AWS, I advised more than 200 enterprises on AI, distributed data, and cloud architecture and developed global technical communities totaling 180+ specialists. At SuccessKPI, I recruited and led a distributed team that shipped an AI-powered contact-center workforce SaaS release within six months. Across these roles I established architecture, DevOps, quality, security, reliability, and operational practices.

Intelligent DataWorks completed its planned operating transition in October 2026. I would welcome a discussion about scaling the global engineering organization, strengthening technical leadership, and delivering reliable enterprise AI capabilities for service operations.

Sincerely,

Keith Steward, Ph.D.
