Risepoint Hiring Team

Re: VP, AI Transformation & Enterprise Architecture

Dear Risepoint Hiring Team,

Leading enterprise AI transformation while establishing the architecture foundation for durable adoption closely matches how I have connected AI strategy, platform engineering, governance, and organization building.

At Intelligent DataWorks, I defined product and technical strategy, recruited and technically led 11 engineers, and remained hands-on with LLMs, RAG, agents, vector search, orchestration, evaluation, APIs, and AWS. We shipped the initial production platform within eight months; it supports 70+ automations across more than 20 workflows and accelerates selected work by up to 50x.

My enterprise work spans both architecture and transformation. At TriMark, I led data consolidation across 11 acquired businesses, delivered the first AWS data lake within seven months, and reduced cross-ERP reporting from roughly two months to one day. At MassMutual, I led cloud implementation across five privacy and AI-governance initiatives. At AWS, I advised 200+ enterprises and developed global specialist communities totaling 180+ people.

I have direct post-acquisition integration experience, though formal pre-close technology due diligence is not a central claim in my background. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about accelerating Risepoint's AI adoption and architecture modernization.

Sincerely,

Keith Steward, Ph.D.
