StarCompliance Hiring Team

Re: Head of Data and AI - EAST COAST

Dear StarCompliance Hiring Team,

Owning the data and AI strategy for a regulated, cloud-native SaaS platform while remaining hands-on with architecture and delivery closely matches my current operating role.

At Intelligent DataWorks, I built the AssistX core and first 80% of its initial application using Python, FastAPI, LLMs, agents, MCP, RAG, PostgreSQL/PGVector, APIs, AWS, and CDK. I recruited and led 11 engineers around 70+ automations across more than 20 workflows with 99.9% availability.

At TriMark, I delivered an enterprise data lake across 11 divisions in seven months, reducing reporting from roughly two months to one day. At MassMutual, I led privacy and AI-governance initiatives involving bias, drift, monitoring, human oversight, and auditability.

My deepest cloud experience is AWS rather than Azure, and my strongest AI evidence is applied LLM, RAG, agent, evaluation, and platform engineering rather than foundation-model training. Exact remote eligibility should be confirmed. I would welcome a discussion about building a trusted Data and AI organization that ships measurable capabilities in a regulated market. I would bring disciplined execution, transparent metrics, and practical technical judgment from day one.

Sincerely,

Keith Steward, Ph.D.
