Swooped Hiring Team

Re: VP of Technology & AI Infrastructure

Dear Swooped Hiring Team,

Integrating technology strategy, AI adoption, data governance, internal infrastructure, and external digital products closely matches the breadth of my operating leadership.

At Intelligent DataWorks, I own strategy, architecture, delivery, security, operations, vendor decisions, and a \$900,000 budget for a production AI platform supporting 70+ automations across more than 20 workflows with 99.9% availability.

At TriMark, I built a seven-person AWS engineering team and delivered the first enterprise data lake across 11 divisions, reducing reporting from roughly two months to one day. At AWS, I advised more than 200 enterprises on cloud, data, AI, security, and platform choices.

My deepest operating experience is in engineering, cloud, AI, data, and product platforms rather than help-desk and hardware lifecycle management. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about building a secure, scalable technology foundation for workforce impact.

Thank you for your consideration.

Sincerely,

Keith Steward, Ph.D.
