ThinKuvate Hiring Team

Re: Vice President of Artificial Intelligence

Dear ThinKuvate Hiring Team,

Setting an organization-wide AI vision and carrying it through model delivery, governance, and executive adoption closely matches my combination of AI strategy, production architecture, and hands-on technical leadership.

At Intelligent DataWorks, I recruited and technically led an 11-engineer team while helping architect AssistX, a production platform using Python, LLMs, RAG, agents, APIs, vector search, orchestration, evaluation, and AWS. We shipped within eight months; the platform supports 70+ automations across more than 20 workflows and accelerates selected work by up to 50x.

At AWS, I advised 200+ enterprises on AI, machine learning, data, and cloud adoption and developed global technical communities totaling 180+ specialists. At MassMutual, I led cloud implementation across privacy and AI-governance initiatives involving transparency, bias, drift, monitoring, auditability, lifecycle controls, security, and human oversight. These roles required explaining complex systems to executives and clients while translating strategic priorities into scalable delivery.

Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a discussion about building ThinKuvate's AI roadmap, organization, standards, and production capabilities.

Sincerely,

Keith Steward, Ph.D.
