Topline Pro Hiring Team

Re: Senior AI Engineer

Dear Topline Pro Hiring Team,

Topline Pro's mandate to build AI agents, chat capabilities, and production infrastructure closely matches my hands-on work.

At Intelligent DataWorks, I architected and helped build a commercial AI platform using Python, FastAPI, PostgreSQL/PGVector, OpenAI and Anthropic models, RAG, agents, LangChain, LangGraph, APIs, and AWS. I remained directly involved in coding, architecture, cloud infrastructure, orchestration, security, and operations while helping an 11-engineer Agile team ship the first release in eight months. The platform now supports 70+ automations across more than 20 workflows and accelerates selected work by up to 50x.

My earlier work adds Django and React delivery, production cloud APIs, MLOps, automated deployment, CI/CD, and close collaboration with Product and QA. At NorthBay, I built the initial AWS data-and-ML accelerator hands-on before guiding its evolution. At SuccessKPI, I translated detailed product requirements into architecture and sprint delivery for an AI-enabled SaaS product.

Although my recent titles include founder and senior leadership scope, my work remains hands-on in software, architecture, deployment, and platform operations. I am deliberately pursuing a durable builder role where that technical depth is central. Intelligent DataWorks is pursuing a strategic acquisition, and I am seeking a long-term operating role elsewhere. I would welcome a conversation about building reliable AI products for Topline Pro's customers.

Sincerely,

Keith Steward, Ph.D.
